

It's not true that all windows are alike

You can see for yourself in the BUDVAR Centre SA showrooms. Where you can choose a product and its parameters so that it meets your expectations and your individual needs. Created in 1997, BUDVAR Centre SA is associated with reliable, long experience, knowledge of the market and fulfillment of expectations of its customers. While its products with the comfort, quality and innovation.

The company's pride and joy is not only its headquarters, but also its employees and customers. BUDVAR Centre SA for years in cooperation with its satisfied customers has been achieving its goals. In contrast to their competition and against the negative trend prevailing in the market the window company BUDVAR Centre SA every year significantly increases its market share. To be able achieving such good results, the company proceeds in accordance with a clear business philosophy- the quality and safety come first. The company's success owes to its young team of 300 pe-

ople, whose mission is to create windows that meet the needs and requirements of even the most demanding customers. High-quality components used in the manufacture of windows are an expression of above-average achievements of the company's suppliers. BUDVAR Centre SA is convinced that this is the only way it can guarantee its customers now and in future safety and quality. Modern PVC windows are suitable for application in any type of a building. They can be applied both in historic structures and single-family houses, elegant office buildings or urban blocks of apartments. Stylish profiles and decorative boards provide the possibility of obtaining the entire stylistic cohesion of windows with building façade and its interior. BUDVAR Centre SA has been at the forefront of producers of PVC window constantly enriching its offer with increasingly sophisticated products and technology solutions. The involvement of its people at every stage of production, advanced technologies and attitudes of research and development, ensure the

best products for its customers. Constantly improving the process of production BUDVAR Centre SA strive to guarantee its customers the comfort and safety for many years. Achieving these parameters is possible thanks to a fully automated production lines, which result in the accuracy and reliability of the company's products. Almost maintenance-free cutting centers, 6-head welders or computerised corner cleaners, which are unseen in other factories, in BUDVAR Centre SA are a daily routine. It is the fully automated production and its full computerisation that enable BUDVAR Centre SA to obtain products with the highest quality suitable for the needs of the market. The factory of BUDVAR Centre SA is one of the most technologically advanced in the country and in Europe. The center of production is in Zdunska Wola. It consists of 7,000 square meters of plants area, 1,000 square meters of office and store area of 15,000 square meters. The company BUDVAR Centre SA for the sake of their customers and the environment manufacture windows compliant with all the requirements of the European Union, which have been identified in the „Green Paper”. As the first manufacturer of wooden windows in Poland started to use the profiles free of harmful substances such as lead. In the profiles used by BUDVAR Centre SA lead and cadmium – stabilizers, which affect the durability of PVC, have been replaced by safe and human friendly calcium-zinc. The use of stabilizers in the composite is necessary. Thanks to them PVC is resistant to climatic factors such as rain, wind, solar radiation and ensure long life of a product. Calcified-zinc stabilizers in the window and door profiles companies BUDVAR Centre SA fulfills these functions while at the same time are environmentally friendly. These two elements are in fact completely harmless. Thus, products from BUDVAR Centre SA do not give off irritating and harmful substances, which means that they are suitable even around small children and people particularly vulnerable as allergies and asthmatics. Profile without lead and cadmium are suitable for recycling or re-treatment, because it does not give off the course to the atmosphere harmful metals. BUDVAR's Centre SA windows are characterized by excellent indicators of thermal insulation (K indicator falls within the required range of values, namely 1,1-1,6 W/m²K), thanks to the usage of special glass framed with steel profiles of 5 and 6-chambers which are a barrier against cold from the outside, thus,

the better thermal insulation. They have also modern design, gentle rounding and bevels provide the modern and elegant appearance to the profiles, aesthetic and invisible glass-side gasket, 13 mm distance from fitting mouth provides with the possibility of using thicker fitting holders, thereby giving additional protection from burglary, and as it was mentioned above 5/6-chamber design and depth of development 80 mm provide optimum thermal and acoustic insulation. BUDVAR Centre SA produces also doorknobs or external roller shutters which may be excellent thermal and acoustic insulation, can protect our privacy and are capable to integrate with the anti-insect meshes. BUDVAR's internal windowsills retain their shape, are durable, scratch- and moisture resistant and recyclable. And to sum up its windows are the brilliant protection from noise, minimize the heat costs, they provide the feeling of safety, and are the perfect ventilation of rooms. On top of that they present modern and harmonious appearance. Export of products represents about 10 per cent of sales and systematically increasing. The company exports mainly to the German market, but also to the Czech Republic, Greece, Sweden, the Netherlands and is gradually expanding its presence in foreign markets. In the Czech Republic BUDVAR Centre SA built its own network to sell its products under their own brand and based in their own salons. Products and the company BUDVAR Centre SA were awarded with many prestigious titles such as the Polish Business Leader, Silver emblem in the competition QI Quality International or the prize in the competition for the best European company. For its windows without lead it received the title „The Discovery of the Year” in the Consumer Laurel Prize competition, and its latest product, which is the Modern type window, received the prestigious European Medal. Dun and Bradstreet, the analytics of the market, considered BUDVAR Centre SA to be one of the most reliable, dynamic and profitable companies in the Lodz region. It is also worth to stress that BUDVAR Centre's SA windows have all the required by Polish law documents, allowing their usage in construction and trading on the Polish market. Few producers can boast of a winning set of certificates proving the highest quality of their services. Rewards given to the company by both the industry as well as the customers are equally important to BUDVAR Centre SA.
